

dedicated internet access

DIA THAT'S ALL BUSINESS.

In today's business climate, customers want Internet with lightning speed, always on and ready for the task. To stay competitive, it's a must to get the most advanced and largest IP network in the country to deliver your critical data. That's where USAD comes in—with over 22,000 access points nationwide. A **reliable high-speed internet** backbone that delivers data securely.

More avenues to get there. Various access options available through cable, fiber and copper, leveraging multiple technologies. With a dedicated port, guaranteed bi-directional bandwidth is available ranging from **1.5 Mbps up to GigE**. Easily integrate internet access with USAD IP voice, data and security services with the convenience of a single bill.

Just the right size. **Scalable** solutions customized for your team: employee size, number of locations, plus voice and data usage. Easily adjust your bandwidth speeds and configuration options to meet your current and future business needs. Flexibility is good.

The protection you need. USAD network design **maximizes redundancy** to safeguard network availability.

The more you get, the more you save with our multi-service discounts.

“over 22,000 access points nationwide”

“integrate internet access with USAD IP voice, data and security services”

“options available through cable, fiber and copper”
