

multi-protocol label switching

WORLDWIDE CONVERGENCE & CONNECTIVITY.

Simple is simply better. USAD's MPLS solution offers the power you need to access data from many locations—all from a single local connection. That's smart savings bringing you **economies of scale** with voice, video and data.

MPLS provides easy to manage, secure, scalable networking solutions for your internal communications—maintain internal customer records, backup file storage and disaster recovery. Take advantage of voice and data traffic over the same network while **reducing costs** and equipment requirements. Maximize your investment with converged solutions from USAD, including DIA, VPLS/EVPLS, and more.

Privacy and Security your business requires. With USAD, you will have your very own private path on the MPLS network, separate from other customers and the public internet. USAD user defined Class of Service and Quality of Service overlays allow for traffic prioritization to best meet the unique needs of your business.

Just the right size. **Scalable** solutions customized for your team: employee size, number of locations, plus traffic and data usage. Easily adjust your bandwidth speeds and configuration options to meet your current and future business needs, ranging from 1.5 Mbps to GigE. Flexibility is good.

The more you get, the more you save with our multi-service discounts.

**“easy to manage,
secure, scalable
networking solutions”**

**“voice and data traffic
over the same network”**

**“your very own private
path on the
MPLS network”**

*“I always recommend USAD!
Every telco we partner with
has heard my speech; not only
was it easy to turn up, the line
quality was better ...”*
