

toll free

THE MASTER SERVANT IN BUSINESS CALLING.

A toll-free number eliminates the barrier to call you. Customers want the ability to reach you by phone to discuss important transactions or service issues. USAD's Toll Free service enhances your business interactions by providing **more reach for employees and customers** – all on our dependable, fully interconnected network.

You pick the protocol. USAD offers dedicated voice services on TDM or IP. IP protocol has the option of secure, VPN or open. For low volume, we can also provide switched long distance.

Migrate to IP. USAD can manage the engineering and implementations for you, on time and right on the money. Our intelligent routing platform directs calls based on underlying carriers' footprint and completion capability.

It's all in the details. With USAD Toll Free service, you will receive vanity or random toll-free numbers, caller ID/CNAM services and overflow routing. You may also receive payphone blocking, origin-of-call blocking and RespOrg Management.

International toll free service (ITFS) is also available.

Bottom line: we'll **increase your revenue and customer satisfaction** by removing the barrier for customers to call you.

The more you get, the more you save with our multi-service discounts.

“dedicated voice services on TDM or IP”

Intelligent Routing

RespOrg Management

“I would highly recommend USA Digital, not just for the high quality of services they offer, but for the willingness and ability to do what it takes to make my company successful.”
